

## ULTRAGUARD 50/50 PREMIXED ANTIFREEZE

Ultraguard -34 Antifreeze is fully formulated antifreeze pre-charged with high levels of nitrite for heavy-duty industrial use. It contains a minimum of 2400 ppm nitrite. Ultraguard -34 Antifreeze is a non-silicate, non-phosphate, non-nitrate, non-amine formula. In addition, it contains additives to minimize hot surface scaling while also preventing heat transfer surface fouling due to minor oil leakage.

### PRODUCT SPECIFICATIONS

Color: Fluorescent Green

Freeze point @ 50% volume\* -34°F max.

pH 10.0-11.0

Reserve Alkalinity 10 ml min.

Specific Gravity @ 60°F 1.110 - 1.125

Nitrite 2400 ppm min.

\* 50/50 Premix is diluted 50% antifreeze with 50% deionized water
